Digital Artwork Guidelines

The following is a general guideline for accepting digital artwork.

If you have any questions, please give us a call.

Vector artwork is the type of file we need. This is a file that has been created in Adobe Illustrator, CorelDraw, or any other vector drawing program. Simply saving a Photoshop file, .jpeg, .gif or any other bitmap file as an .eps file will not convert your file to vector.

File Formats: Silkscreen: .eps and .ai are preferred. Other formats may incur additional art charges.
Digital Output: .eps & .ai are preferred. .psd, .tif, & .pdf may be acceptable.

Fonts: Please include all files of the fonts used in your artwork, otherwise, please convert all text to outlines.

File Resolution: Minimum of 300 dpi is preferred.

Media: CD-ROM
DVD-ROM

Email: Only files of 3 MB or less may be emailed. Otherwise, please mail files on acceptable media to address above, or upload the files to our FTP.

FTP: If the file size is larger than 3 MB, or if there are multiple files, please upload the files to our FTP server:

FTP Address: [ftp.caravancanopy.com](ftp://ftp.caravancanopy.com)

Username: caravanftpuser

Password: newlookyou

Please upload it to the PRIVATE folder.

Color: All artwork should have a color hardcopy provided with files. For silkscreening, spot colors (PMS Solid Coated) are required. For digital output, CMYK or spot colors are acceptable. A color proof will be necessary if sample is printed or PMS colors are not provided with artwork.

Scanning: We can scan your non-digital artwork and create vector art from it. Please consult with us for more information. Additional art charges will apply.
