

Custom Products Catalog
www.caravancanopy.com

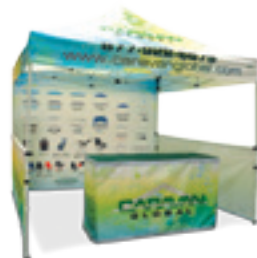

Our story began in 1999. Caravan® Global, Inc. started manufacturing instant canopies and outdoor leisure products based on three values: durability, portability, and ease of use.

Today, Caravan® Global, Inc. continues to actively reinforce these values in every product we design, engineer, and manufacture. Through durable, portable, and easy to use products, our ultimate goal is to enhance the lives of our customers by providing comfort and convenience. When you purchase a Caravan product, you are guaranteed the highest quality products manufactured by a motivated and knowledgeable organization dedicated to being the best. In addition to outdoor leisure products, Caravan® also maintains a full-service custom graphics department that offers a wide variety of custom shelters and promotional tools, creating an ideal advertising tool.

Caravan® Global, Inc. continues to be a leading manufacturer of outdoor merchandise, providing consumers with the products they desire through functional and innovative designs. Our commitment to service and timely delivery makes us the preferred manufacturer for outdoor products.

TURNAROUND

UNLIMITED REVISIONS

LOGO RE-CREATIONS

UNIQUE DESIGNS

Our custom graphic department has over 19 years of experience in large format printing. We are a perfectionist. From artwork revisions to logo recreations, we offer an unparalleled graphic design service.

HOW IT WORKS

SEND ARTWORK

Send us your logo, tagline, or image to start the graphic process.

RECEIVE RENDERINGS

We will send you a free mock up for your review.

APPROVAL

With unlimited revisions, go ahead and approve once it's perfect

ENJOY!

We will get working on it immediately. Unless rushed, turnaround time is 5-7 business days

FABRIC COLORS

Caravan® Canopy uses 500 denier, fire resistant fabrics on all custom canopy products. With 24 stock fabric color options and unlimited dye-sub-printed options, we can produce a canopy, banner or flag that matches perfectly to any logo or graphic!

PANTONE COLOR MATCHING SYSTEM

Caravan® Canopy uses the Pantone Matching System Color Guide for screen printing inks and dye-sublimation dyes. When printing your Corporate Identity, school colors and /or other artwork, our art department will first match your colors to the PMS Color Guide as closely as possible.

COLOR MATCHING IS NOT AUTOMATIC!

If you have a specific color in mind or want your canopy fabric to match your logo, you must tell your project manager what specific Pantone PMS number you want us to print. This must be requested by you as we do not automatically take liberty in changing your colors for you.

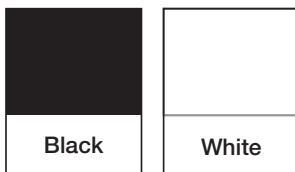

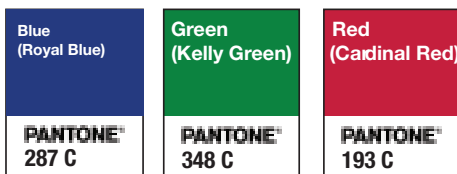

California State Fire Marshal Registration Number F-64901
California's fabrics testing standards are the most stringent in the United States and are recognized by all of the 50 states and Canada to either meet or exceed their requirements.

Caravan Canopy fabric materials meet or exceed the minimum requirements of flame resistance established by the California State Fire Marshal for products identified in Section 13115, California Health and Safety Code.

This certifies the fabrics used in the manufacturing of Caravan Instant Canopies meet the CPAI-84 / NFPA-701 / SOR/ 90-245-2011 / ULC-S109-03 Flame Retardancy Standards, based on testing data from SGS-CSTC Standards Technical Services Co. Ltd.

PRINT OPTIONS

We have different print options for you to choose from that will fulfill any designs you want

FULL DIGITAL / DYE SUBLIMATION:

- Unlimited color combinations
- Great for color gradations, live images, and multiple designs
- Capable of printing on every inch of fabric
- Fixed price based on square footage
- Image is embedded with fabric

With Dye-Sublimation uses high heat and solid dyes to produce photo lab-quality images. Dye-Sub printers contain a roll of transparent film made up of page-sized panels of color. Solid dyes in cyan, magenta, yellow, and black are embedded in the film. Dye-sublimation printers lay down color in continuous tones one color at a time, instead of dots of ink.

SILK SCREEN:

- Choice of 24 fabric colors
- Less expensive than full digital with multiple units
- Limited to 4 to 5 logo colors: best for simple logos
- Price drastically decreases for multiple units or future reprints
- Fluorescent (highlighter) and Metallic Colors Available

Screen printing is a printing technique that uses a woven mesh to support an ink-blocking stencil to receive a desired image. The attached stencil forms open areas of mesh that transfer ink or other printable materials which can be pressed through the mesh as a sharp-edged image onto a substrate.

FULL DIGITAL / PATCH APPLICATION:

- Almost same advantages as full digital print only more cost efficient
- Printed area can be sewn, velcroed, or slid into a clear plastic valance band
- A choice of 24 fabric colors to attach digital patch

Heat transfer printing is a method of transferring a desired pattern via heat onto a substrate. There are two ways to transfer the pattern--with a press or with an inkjet or electrostatic printer. Suitable substrates include paper, plastic, cloth and many others.

ALUMASHADE®

Light-Duty Aluminum

The AlumaShade® sets the standard for lightweight, light-duty commercial-grade shelter performance. It is ideal for business applications and for those who travel or ship their canopy to shows and events.
